

Road Signs Ireland

Road signs are the standard means of regulating behaviour on the motorways in Ireland to communicate basic rules and regulations through simple graphics that can be understood easily. In most of the parts, these road signs usually appear generic and similar to those found in other places across Europe and beyond, but it is important to mention that road signs in Ireland may have a few unique differences and exceptions.

Irish Road Signs are generally divided into four different aspects. These are Regulatory road signs, Warning road signs, Information road signs and motorway road signs.

Warning signs are given as

Dangerous Corner Ahead

It is a right angled pointer and its pointer shows the driver which side, the road is going to make a sharp turn, It shows a very turn in any direction and no matter how much experienced you are, you need to take care of this sign and give more attention and use horn in this case.

Mini-Roundabout Ahead

Ireland has a complex road structure and has roundabouts in most of its road junctions. This consists of three arrows making a circle with a small circle in the centre showing a small roundabout ahead. So you need to slow down and pass through it carefully.

Two-way traffic

It consists of two arrows pointing in opposite directions to show that the road has two lanes to let traffic go in both the directions divided by a concrete ridge. Also, each lane is further divided into fast and slow lanes. So, you must drive carefully whether the lane is fast and slow and drive accordingly.

Series of dangerous bends ahead

This is a snake-like looking sign showing there are multiple bends ahead on the road due to tough topography or rough roads. It is generally placed on the hilly areas and areas that pass through forests and other difficult areas.

Restricted Head rooms

It is a sort of restriction on the vehicles passing through this road. It shows the signs of allowing only a particular kind of vehicle to pass through as a vehicle with a limited height and width. If your vehicle does not fit in the specifications as given then you will face restrictions ahead.

Roundabout Ahead

It is a sign showing three arrows making a circle and pointing towards the next arrow showing that there is a big roundabout near you ahead and you should slow down and concentrate on the path carefully.

Merging traffic

It is a sign showing that the two roads are going to merge ahead and all the traffic is going to pass through a single lane. The signs have two lanes merging at a point to show the merger of traffic.

Dangerous Bend Ahead

Sometimes this sign is confused with the dangerous corner but as both of them show the dangerous turn ahead. But the dangerous bend shows the presence of a steep curve whereas the dangerous corner shows the turn at right angles. On this road, you need to slow down and give horn to prevent any mishappening if two vehicles are crossing the turn at the same time.

Series of dangerous corners ahead

This sign contains an arrow with multiple sharp bends showing that the road ahead is going to take multiple sharp turns one after the other within the single lane only. This is to aware the drivers to slow down and look for the turns as it won't be visible ahead for the upcoming vehicles.

T-Junction

It shows that the lane you are travelling in is going to enter the new straight lane or the lane is going to merge into a highway which has more traffic. While entering the wider road, you must take care of the other vehicles passing by as the speed of vehicles travelling on this road generally passes with higher speed.

Junction Signs

It shows the sign of merger of roads into wider long roads and presence of more traffic with vehicles of high speed that requires more care.

Junction signs are:

Crossroads

Side road

T-junction

Y-junction

Staggered crossroads

Advanced Warning Signs of Roads

These driving test road signs insist to take certain actions ahead and warn regarding some condition so that the driver can take extra care while passing through these junctions.

T-junctions of a dual carriageway

Crossroads with dual carriageway

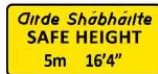

Crossroads

General Warning Signs

The other warning signs are used to give information regarding upcoming hurdles or the movement of other things like animals, cyclists or a sudden change ahead like slippery road or sudden dip which might not get noticed through eyes only so that you can take the necessary precautions and do not fall into some mishappening.

Drive on left

Safe height plate

Low-flying aircrafts

Road divides

Merging/diverging traffic

Dual carriage ends

Traffic crossover ahead

Overhead electric cables

Traffic signals ahead

Pedestrian crossing ahead

Slippery road ahead

Road narrows on both sides

Level crossing ahead, guarded by gates or lifting barrier

Level crossing ahead, unguarded by gates or lifting barrier

Level crossing ahead, guarded by gates or lifting barriers

Stop when lights are red

Automatic level crossing ahead

Chevron board (left)

Chevron board (right)

Road narrows from left

Road narrows from right

Tunnel ahead

Cyclists

Start of a passing lane

Lane loss

Start of a climbing lane

Loop road ahead

Sharp dip ahead

Series of bumps ahead

Sharp rise ahead

Wild animals ahead

Sheep

Cattle and farm animals

Accompanied horses and ponies

Crosswinds

Steep descent ahead

Steep ascent ahead

Danger of falling rocks

Unprotected quay, canal or river

Tram Signs

If there is a track for railway lines or a tram moving ahead then the tram signs are placed to make you aware of the network so that you can slow down, look both sides and when it is safe then only cross it. safe then only cross it.

Tram lane crossing ahead

Tram lane warning signs for pedestrians (look left)

Tram lane warning signs for pedestrians (look both sides)

Tram lane warning signs for pedestrians (look right)

Slippery for cyclists

Warning signs for schools and children

To restrict the drivers from over speeding and to protect the children, road signs are placed in the way to mark the schools ahead.

School ahead

School children crossing ahead

Children crossing ahead (in residential areas)

Warning signs for road work

If there is construction work on the roads and men are at work to ensure the safety of the workers and the drivers both, road work warning signs are placed to make them use the safe way out of the sight.

Road works ahead

One-lane crossover (out)

One-lane crossover (back)

Move to right (one lane)

Move to left (one lane)

Move to right (two lanes)

Move to left (two lanes)

Obstruction between lanes

End of obstruction between lanes

Start of central reserve or obstruction

End of central reserve or obstruction

Lanes diverge at crossover

Lanes rejoin at crossover

Two-lanes crossover (back)

Two-lanes crossover (out)

Single-lane (for shuttle working)

Two-way traffic

Road narrows from left

Road narrows from right

Road narrows on both sides

Offside lane (of two) closed

Nearside lane (of two) closed

Offside lane (of three) closed

Nearside lane (of three) closed

Two offside lanes (of three) closed

Two nearside lanes (of three) closed.
Two alternative styles

Offside lane (of four) closed

Nearside lane (of four) closed

Two offside lanes (of four) closed

Two nearside lanes (of four) closed

Side road on left

Side road on right

Site access on left

Site access on right

Temporary traffic signal ahead

Flagman ahead

Slippery road

Loose chippings

Queues likely

Hump or ramp

Pedestrian cross to right

Overhead electric cables

Pedestrian cross to left

Uneven surface

Detour ahead

Detour to left

Detour to right

Road closed

Diverted traffic left

Diverted traffic

Diverted traffic

Diverted traffic

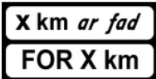

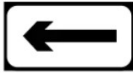

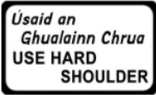

End of detour

Detour destination

Informative Signs for work at road

To give the information of the nature of work or construction at the roads, the speed limit that they have to maintain, the dimensions of the vehicle that can pass through and other regulatory signs.

		 	 
Distance	Length	Direction	Direction and distance
			
Slow	End	Cautionary speed	Type of works
			
Use hard shoulder	Unfinished road surface	Barrier board	Concealed Entrance
			
Chevron board	Speed limit ahead	Speed limit ahead	

Manual Signs for Traffic control at road

The signs to direct the vehicles on the way to move.

			
Flagman ahead	Stop	Either form of go can be used	Either form of téigh can be used

Regulatory Traffic Signs

Traffic control signs are used to regulate the vehicles in a specific order. These are primarily for the new drivers entering the area to inform them about the rules which when violated might attract stiff penalties and to make them aware all the time during their journey so that they don't forget to follow it.

Stop

Yield

School wardens stop sign

Parking prohibited

No left turn

No entry or 'No straight ahead'

No right turn

Clearway

Max speed limit 30kmh

Max speed limit 50kmh

Max speed limit 60kmh

Max speed limit 80kmh

Max speed limit 100kmh

Max speed limit 120kmh

No ridden or accompanied horses

No bicycles

Maximum gross weight (traffic management)

Maximum vehicle length

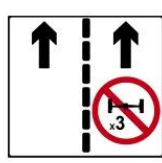

Maximum vehicle width

No entry to vehicles

Maximum axle weight

No overtaking for three-axle vehicles

No horse carriages

Height restriction

No overtaking

Taxi rank

No entry for large vehicles (by reference to weight)

No U-turn

End of the restriction zone

Parking permitted

Pedestrianised street

Zonal restriction – parking of large vehicles

Disc parking plate

Mandatory Turns at Junctions

To show the one way turns ahead which are compulsory to take and follow to move ahead on the path.

Turn left ahead

Turn right ahead

Turn left

Turn right

Straight ahead

Keep left

Keep right

Pass either side

Mini roundabout

Other Manual Work Signs for work at road

Stop

Either form of Go

or Téigh can be used

No entry for pedestrians to tramway

No entry to goods vehicles (by reference to number of axles)

Contra flow bus lane

With flow bus lane on right

With flow bus lane on left

Tram lane on left

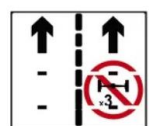

Tram lane on right

Start of cycle track

End of cycle track

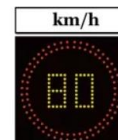

In a tunnel goods vehicles cannot use right-hand lane (by reference to number of axles)

Electronic periodic speed limit sign

Electronic periodic speed limit sign at school

Variable speed limit

Tram only street Ireland

Turn back

Tram and access only street

Bus only street

Pedestrians and bicycles only

Separate bicycle and pedestrian lanes

Traffic Lane Signs

To direct the drivers for the possible way ahead and to manage the movement of traffic by allowing a specific lane to move at a time.

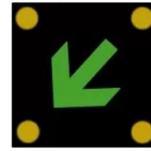

Go (Lane open)

Stop (Lane closed)

Move into the right-hand lane

Move into the left-hand lane

Variable Message Signs

To show the information other than the traditional traffic road signs.

Overhead VMS

Mobile VMS displaying text message

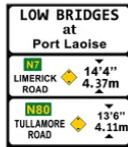

Mobile VMS displaying chevrons

VMS chevron formats

Road Signs providing information

These are the rectangular boards providing information for drivers to help them know about the interstate roads, the nature of path, movement of cyclists, pedestrians and other fellow drivers.

Tourist Information Signs

This is to direct the travelers about the type of road and the vehicles which are allowed to move, the next destination on the road and the upcoming places like the ferry sign, nearest village, industrial region and much more.

Motorway Signs

Motorway ahead

Motorway ahead

Advance direction sign

300m to next exit

200m to next exit

100m to next exit

The motorway ends 1km ahead

Motorway ends 500m ahead

End of motorway

Route confirmatory sign for M7

Advance direction for destination

Entry to motorway

Toll plaza ahead

Toll charges

Toll plaza information sign

Garda only

Authorized vehicles only

Typical 2km next exit sign

Motorway service plaza

Route confirmatory sign with Euro Route marker plate

Typical lane gain sign
